

Methane Emission Control

Presented by Ronald Walsmith

October 21st, 2010 – 11:30 am

Hilton Garden Inn – 805 Amity Rd – Conway, AR 72032

About the EPA, GHGs and Methane Emissions

Making the Presentation about Methane Emissions will be Ron Walsmith. Ron is an SPE Silver Member with over 30 years experience in field operations and education and training. He is a Petroleum Technology faculty member at the University of Arkansas Community College in Morrilton and works as a consultant for Arkoma Well Analysis and Consulting during the months that is not teaching. He is the faculty advisor for the UACCM SPE Student Chapter. Mr. Walsmith has worked as a production engineer and as a drilling engineer and has previously been Director of the Mid-Continent Oil and Gas Training Center in Oklahoma and Director of Petroleum Studies at Hocking College in Appalachia. At Hocking College, he engineered and supervised the school's natural gas self sufficiency program by drilling and producing wells on the campus and surrounding leases using faculty and students to man the school's drilling rigs. Ron was also manager of customer support services, which included field engineering, for a subsidiary of Baker Industries and has been an international consultant and training specialist for Lucent Technologies.
